## Install your SIM card

Your SIM card may be pre-installed. If you need to install a SIM, follow these steps.

1. Locate the SIM card tray.
2. Insert the SIM ejector pin into the hole beside the card tray.
3. Pull out the card tray.
4. Insert the nano-SIM card in the tray with the gold contacts facing down.

5. Insert the card tray back into the slot.

## About your phone

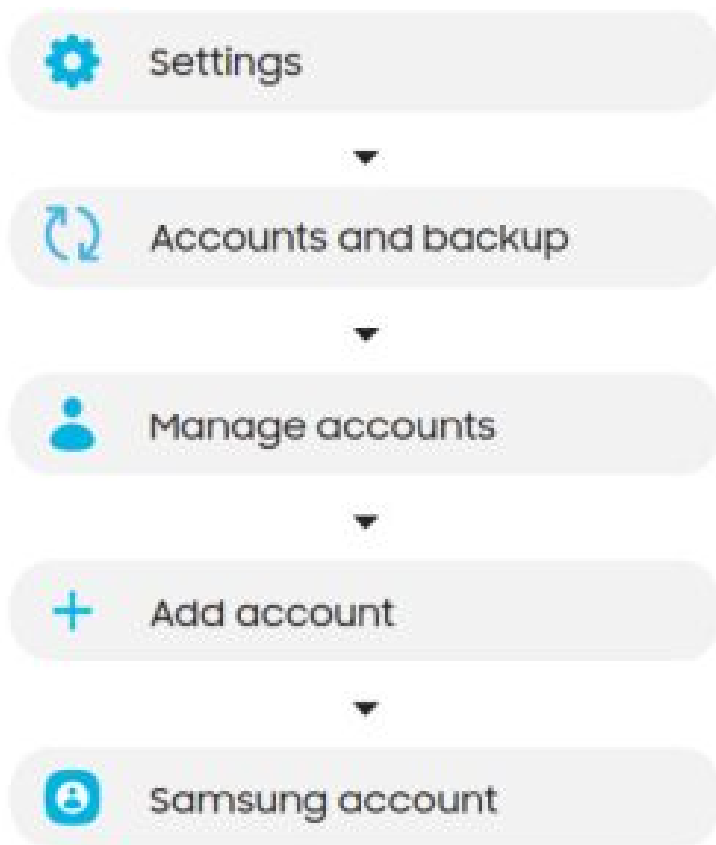

## Samsung account

Get the most out of your phone with your Samsung account.

You can sign in to your Samsung account, create an account, or sign up with your Google account.

With your phone and your Samsung account, you can:

- Use Samsung Pay
- Schedule repairs
- Back up your phone
- Restore your phone and more

## **APPROVED FIRMWARE VERSIONS**

This device will only operate with firmware versions that have been approved for use by your wireless carrier and the device manufacturer. If unauthorized firmware is placed on the device it will not function.

## **INFORMATION ABOUT SAFEGUARDING DEVICES**

We encourage customers to take appropriate measures to secure their devices and invite them to take advantage of the features available on this device to help secure it from theft and/or other unauthorized access and use. This device has a locking function (e.g., user-defined codes or patterns) that can serve as the first line of defense against unauthorized use or access to stored information. Preloaded security applications that allow customers to track or locate misplaced devices can be found on several devices. Lost or stolen devices should be immediately reported to your wireless carrier so that proper measures can be taken to protect accounts. For additional information, visit your wireless carrier's Privacy Policy.

**5G:** Devices may use multi-band dual connectivity to receive and dynamically route traffic between both 4G LTE and 5G signals to support connectivity. The network architecture providing dual connectivity could result in instances where a device indicates a 5G connection when temporarily utilizing only 4G LTE. As 5G technology develops, devices will be able to experience direct and continuous 5G where available.
